Sub:- Policy guidelines for numbering system of Relay hut in automatic block section.

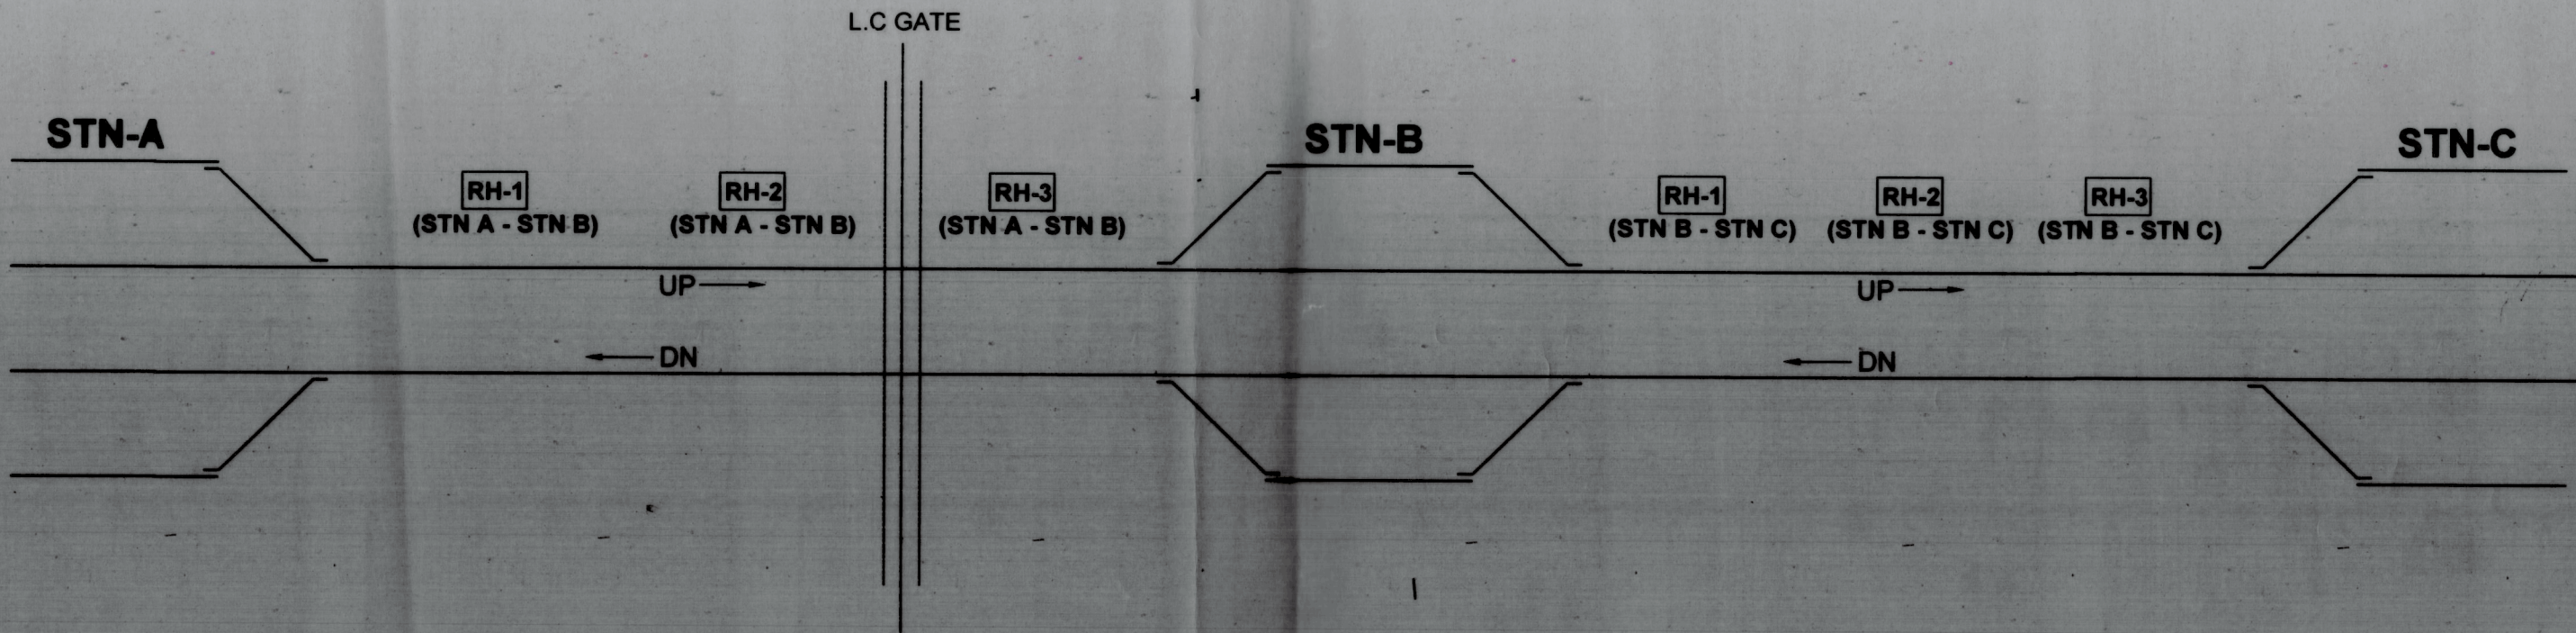

A uniform relay hut numbering system is to be adopted over ECR. Numbering of relay hut in each block section should start in UP direction from 1 & onwards with codes of concerned block section for identification of RH location. If any relay hut is lying at LC gate, then its numbering should be in same serial no. A typical numbering system is attached here with for implementation over ECR with immediate effect.

This has the approval of PCSTE/ECR.

29/4/2024.
