Sub:- Data logger report for loose packing.

Facility to generate various safety related reports have been programmed in data loggers provided at all stations in ECR. Data loggers have been programmed to monitor loose packing of points.

It has been noticed that the Memo given to the PWIs regarding the loose packing of points are not being given due attention in field. This will lead to subsequent failures as well as can lead to an unsafe situation.

It is therefore advised that point loose packing reports generated from data loggers be put upto DRM daily so that these issues are resolved at the earliest.
