East Central Railway

S&T Policy Circular No. 4

Sub: - AMC/AMRR of Modern Signalling Equipment (IPS, Data Logger, EI & SSDAC/BPAC).

In recent few years, large number of modern Signalling equipments such as IPS, Data Logger, Electronic Interlocking, Digital Axle Counters and BPAC etc. has been installed in the divisions. These equipments form a very critical link in the signaling system hence ensuring a very high availability for these equipments for smooth operation of Railways is extremely essential. As requisite expertises for maintenance/repair of these sophisticated assets are not available in the divisions, it have been decided that divisions must go for AMC/AMRR contract for these Modern Signalling equipment with 10% of spare module availability.

This issue with the approval of CSTE/ECR.

(Arun Kumar) 31/03/08
Chief Signal Engineer
for GM(S&T)/ECR
