

S&T Policy Circular No.7

Sub: AMC/AMRR of Modern Telecom Equipments

In recent few years, large number of modern telecom equipments, such as Train Display system, Coach Guidance system, Digital Clock, Railnet equipments, Integrated Microprocessor based Auto-announcement system, Exchanges (Any type), P.D.Mux, STM Equipments, Voice logger, Control charting equipments (For DNR only), VHF sets, Fax Machine, MW Radio Digital/Analog(7 GHz), OFC cable etc. has been installed in the division.

These equipments form a very critical link in telecom system hence ensuring a very high availability for these equipments for smooth operation of Railways is extremely essential. As requisite expertises for maintenance/repair of these sophisticated assets are not available in the division, it has been decided that division must go for AMC/AMRR contract for these modern telecom equipments with 10% of spare module availability.

This issue with the approval of CSTE/ECR.
