East Central Railway

Sub: Monthly Limit for the opening of Relay Room.

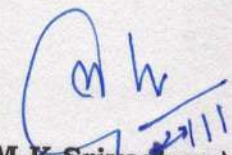

During S&T Review meeting, GM has shown concern over frequent opening of relay room and instructed to limit the opening of Relay Room.

In view of above, it has been decided that for maintenance of signaling gears **Eight time** opening of Relay Room in a month shall be considered normal, above that shall be monitored by Sr. DSTEs. If relay Room opening exceeds **Twelve times** and/or there is some unusual reporting in a month attention of HJP/HQ will be required.

For construction/alteration work in existing signaling circuit, opening of relay room should be kept bare minimum.

This should be read in conjunction of JPO No. 4/2014.

This has approval of PCSTE/ECR.
