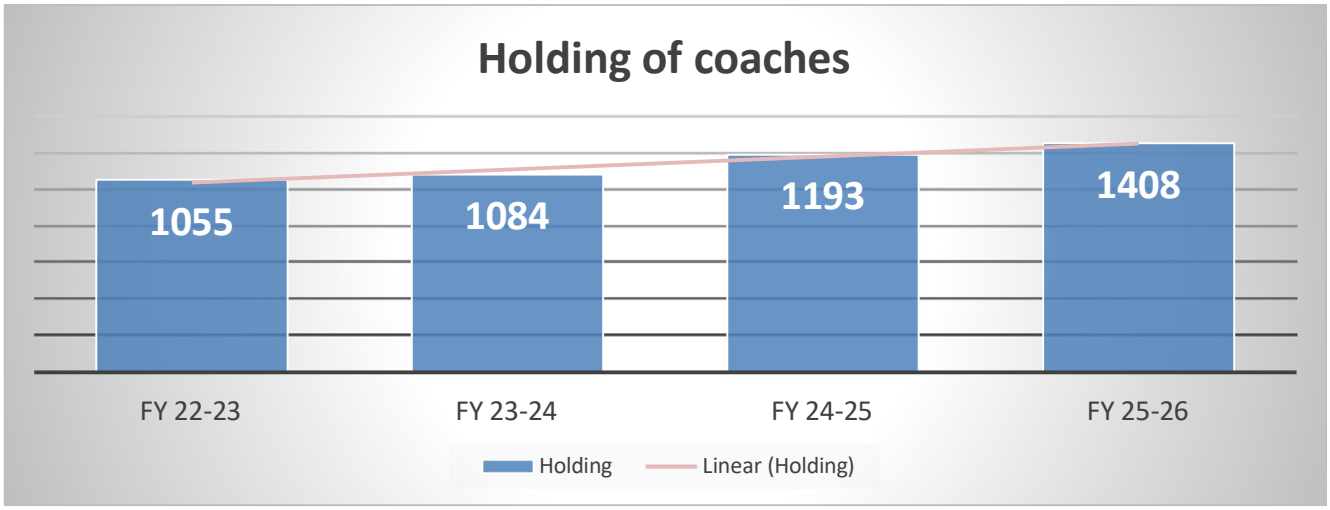
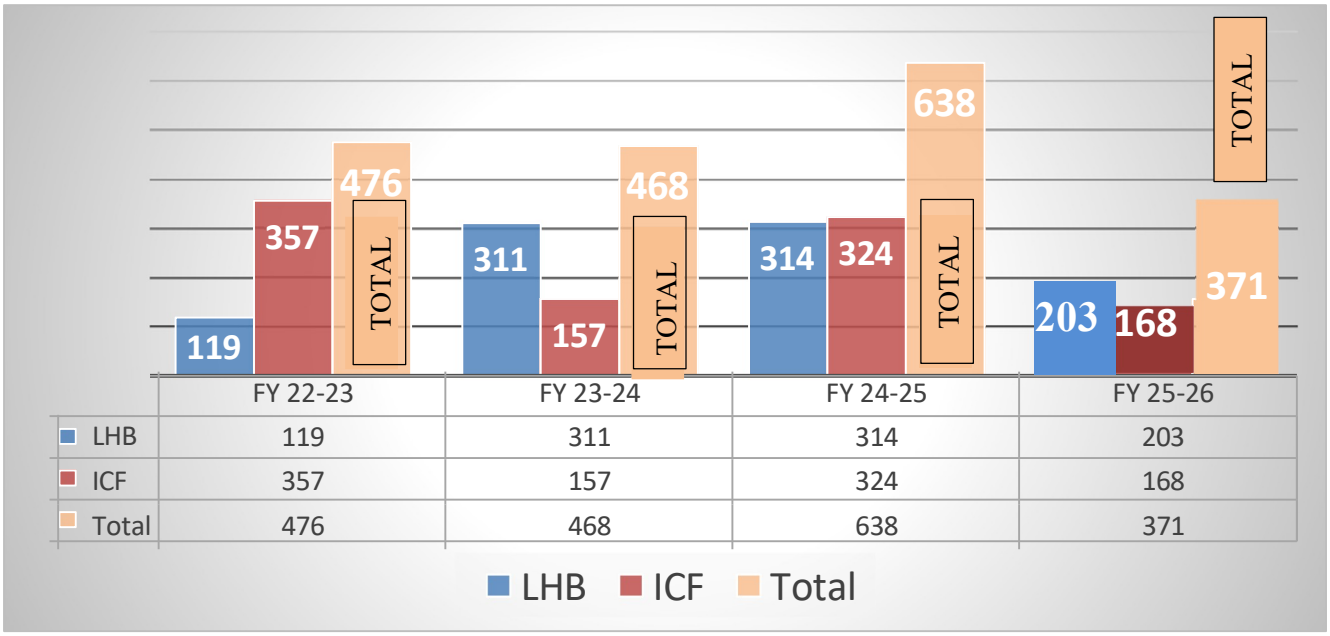
Chapter-05 Performance Highlights/ Achievements

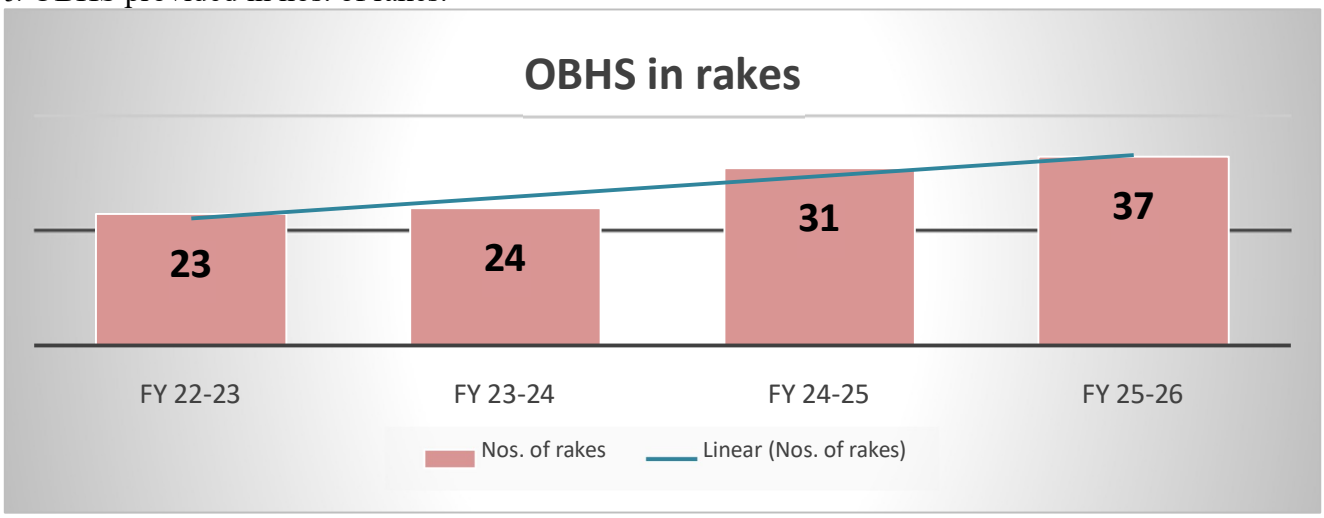
1. Increase in coach holding of SPJ Division



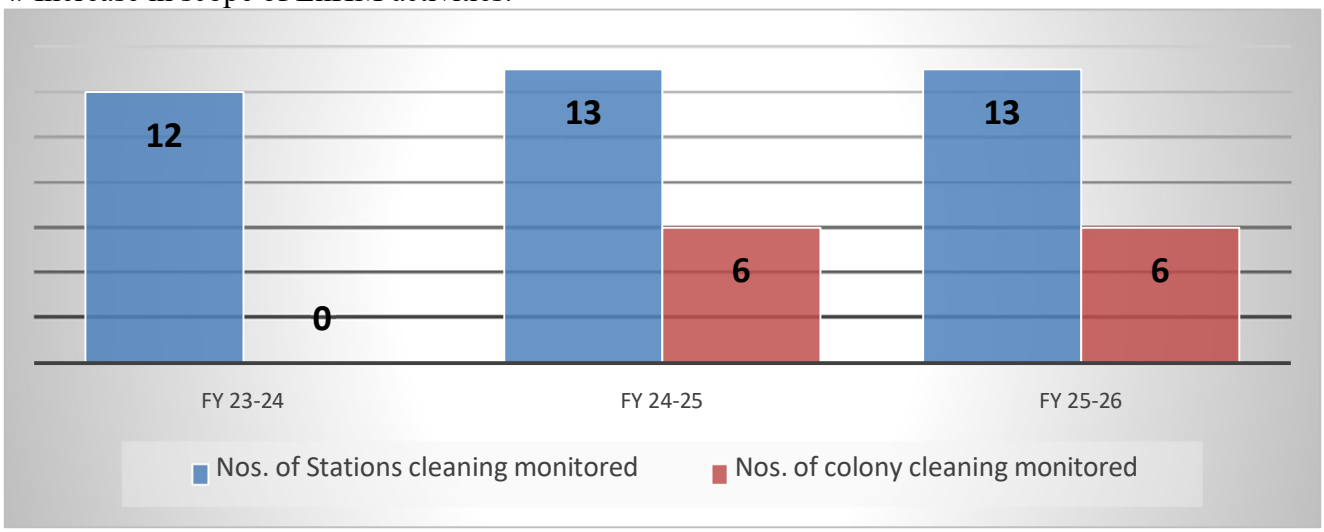
2. IOH done in coaches in FYs:



3. OBHS provided in nos. of rakes:

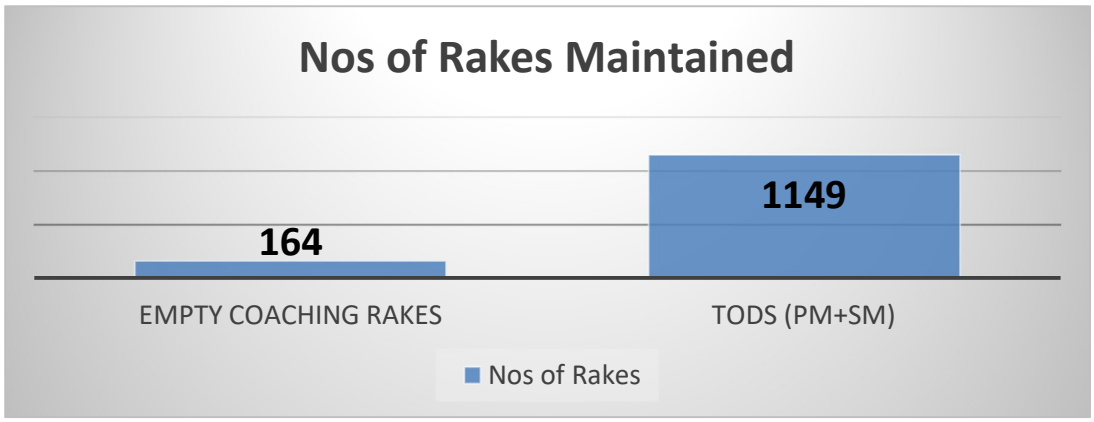


4. Increase in scope of EnHM activities:



5. Newly commissioned departmental laundry at DBG & SHC. (*Work is in pipeline at RXL & JYG*)

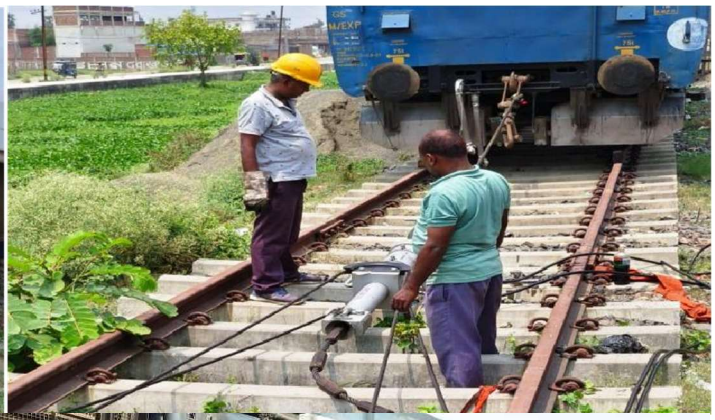
6. Maintenance of 1149 nos. TODs & 164 nos. Empty Coaching rakes on Washing Pit over SPJ division with same manpower.



Good work Done

1. Infrared thermometer has been purchased for measuring bearing temperature.

02. Mock drill was successfully conducted at the SHC Coaching Depot with the participation of nominated staff from ART (Accident Relief Train). The primary objective of this drill was to enhance our preparedness to tackle unforeseen events or emergency cases effectively. During the mock drill, one of the key scenarios simulated involved the lifting of a locomotive using a hydraulic jack. This exercise provided valuable hands-on experience to our staff in utilizing this equipment in a safe and efficient manner.



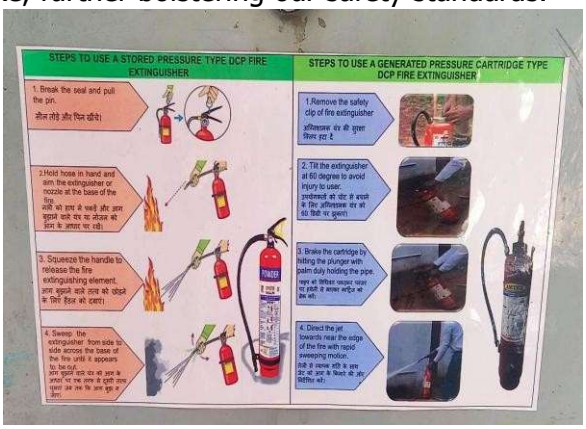
03. Procurement of a Pinion Puller Extractor for ART. This device is a crucial addition to our equipment inventory, particularly for handling emergency situations. The Pinion Puller Extractor plays a vital role in our operations, specifically in the extraction of pinion gears from DEMU and MEMU rakes when traction motors encounter malfunctions during routes. Its functionality and efficiency are invaluable in ensuring minimal disruption to our services and swiftly addressing technical issues on the field.

4. New EPPFS fitments in 60 coaches by SPAC. EPPFS helps in proper flushing by increasing pressure of flushing water from pan pores.

5. Water Hydrant Fitment at BMKI Motihari Station:

Fitment of water hydrant at BMKI Motihari station has been completed at Pf no. 1 to facilitate en-route watering of trains.

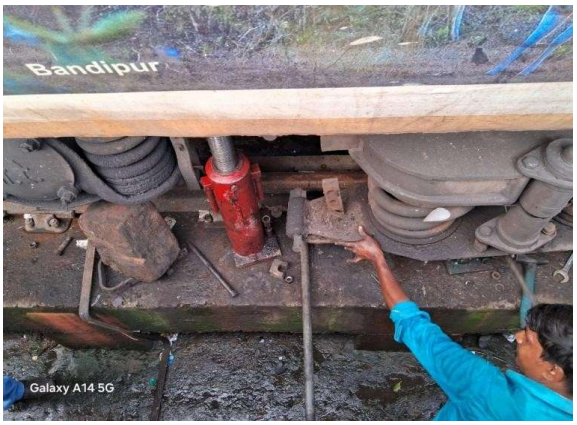
6. Stickers pertaining to the proper use of fire extinguishers have been printed and affixed in all coaches across the primary rakes. We are confident that these stickers will contribute significantly to raising awareness and preparedness among staff and passengers alike, further bolstering our safety standards.



7. Laboratory up gradation is being done at JYG in train no. 12561.

8. Portable hardness tester machine has been procured for the SHC Coaching Depot. This acquisition is intended to enhance our maintenance capabilities, specifically for measuring the hardness of metal components of essential parts of the bogies during both sick line and washing pit maintenance operations. The introduction of this advanced equipment will significantly improve the accuracy and efficiency of our maintenance processes, ensuring that the components meet the required hardness specifications and contribute to the overall reliability and safety of our rolling stock.

9. Bolster spring changed at washing pit/DBG during washing pit maintenance by depot staffs.



10. Water raising equipment testing work stand prepared by in house resources at DBG depot.

11. With reference to the guidelines issued by the Railway Board concerning emergency preparedness in coaching rakes. Rope ladders have been locally procured for each LSLRD coach running in the primary rakes. These rope ladders have been purchased to ensure compliance with the safety standards and to enhance emergency response capabilities, as outlined in the Railway Board's directives.

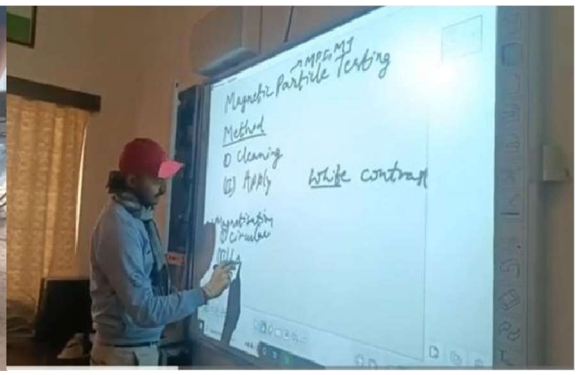
12. Measurment of stiffener palte of all coaches during pit maintenance, and in sick line thcikness of stiffener paltes physicaly measured of all coaches.

13. Total of 1,500 pillow covers were cut and new fabric was stitched depot to provide a uniform look to the linen for the trains. This efforthelped us achieve **zero complaints** regarding dirty pillow fabrics for October month.

14. Commissioning of Mechanized departmental laundry at SHC & DBG depot. Departmental laundries will help in reducing railmadad complaints.

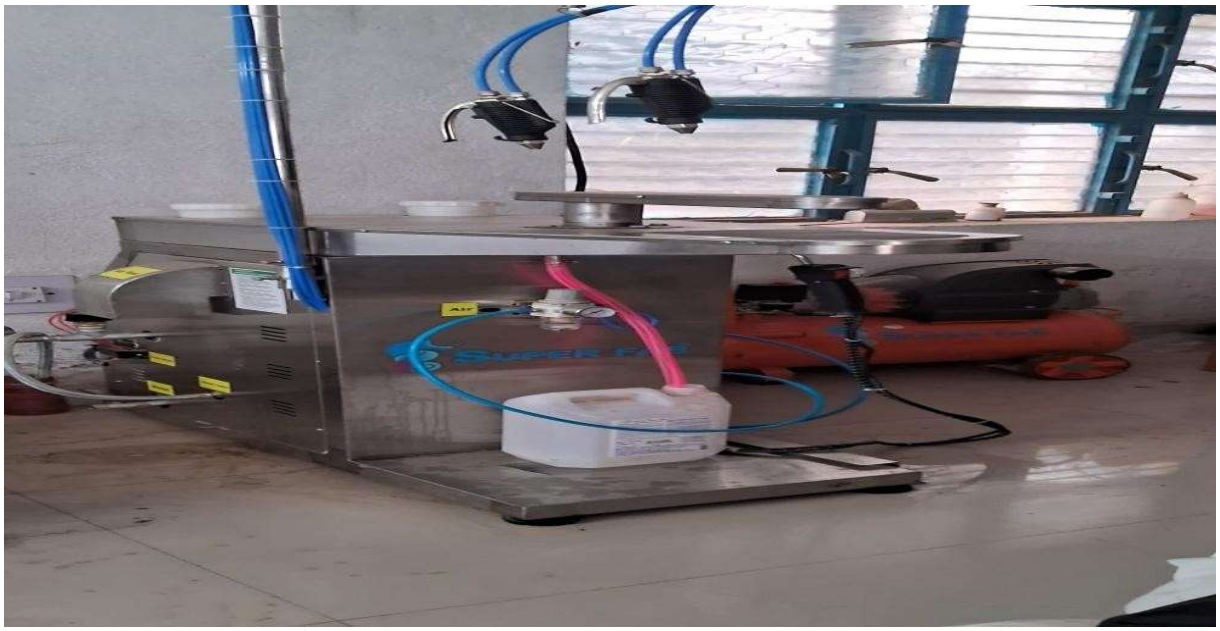
15. Conversion work of manual mode operation of FDSS fitted in power car and pantry car to automatic mode operation has been completed in all physically available Power car and pantry car.

16. An MPI (Magnetic Particle Inspection) testing machine has been procured and installed at the SHC depot. This advanced equipment is specifically intended for crack detection in the knuckles of the CBC (Centre Buffer Coupler) during the SS-1 schedule conducted at the sick line. Additionally, to ensure optimal utilization of this machine, our staff members have been thoroughly trained on its operation and maintenance. This training equips them with the necessary skills to conduct reliable and accurate inspections as part of the SS-1 schedule.



17. A gadget has been prepared in sick line for fitment of Tertairy lock pin.

18. A spotting machine has been installed in the departmental laundries. This machine is specifically intended for the removal of stains from linen items provided in passenger trains.



19. 10 nos. Metallic Garbage boxes have been installed over designated locations of Samastipur Railway Premises.

20. A bowser is used in the SHC Coaching Depot for transporting fuel safely and efficiently from RCD/SHC to the washing pit line. It is primarily used to carry HSD (High-Speed Diesel) oil required for fueling the Power Cars during pit maintenance.

21. Mock Exercise has been conducted with NDRF Team at SPJ Yard on 14.11.2025.
