

PCE's Circular No. 11/2007/Works

Sub- Operation & Maintenance of Chlorination Plant

Chlorination Plants are being installed at different stations through works contract. It is noticed that tender schedule of existing work of chlorination plants very frequently contains the provision for "operation" too apart from provision for installation, commissioning and maintenance. The inclusion of provision for "operation" of these chlorination plants by contractual agencies, create complications subsequently.

Therefore in all future cases the operation of these plants should be done by the department labour only and under no circumstances a contractual agency be involved in operation of these plant. Accordingly operation part should not be included in the tender schedule of the work of Chlorination Plant.
