

P.Us.

Joint Procedure Order in connection with Emergency communication set-up in Section control in Non-RE Area.

- (1) Emergency communication through Quad cable has been provided through Emergency sockets in the sections to facilitate communication with divisional control office by Guard who is equipped with Light weight PCP sets.
- (2) Presently, Divisional HQ equipment has been provisioned at Telecom Control Test Room. In case of emergency, Guard can communicate with Telecom Test Room of respective divisions in Non-RE Area.
- (3) Therefore, it is decided to install Divisional HQ Equipment set-up at the respective section control so that Guard can communicate with respective controllers directly as has been done in overhead alignment communication system.
- (4) In addition to installation of Emergency communication with Section Controller vide item 03; a similar set up of Emergency communication shall be available with Dy.Chief Controller/General for uninterrupted communication at the time of failure.
