

East Central Railway

Office of the
General Manager(Engg.)/Hajipur

PCE's Circular No.- 37 /2009/Works Sub. : Seating arrangement at Platforms.

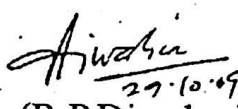

It has been observed that the height and width of seating arrangements on Railway platforms, such as benches adjacent to walls, around the trees and around the columns of platform sheds are not uniform at different stations. In order to ensure that the passengers get proper seating comfort, there is a need to standardize these parameters. Therefore, in future, for all new construction/ replacement/ repair, the following parameters shall be adopted:

- | | |
|---------------------------------|---------------|
| a) Seat height from PF surface: | 435 ± 5 mm |
| b) Seat width: | 390 mm (min.) |
| | 430 mm (max.) |

If two side seating arrangement with a backrest is provided, the seat width on either side should within the range. The seat width in such cases shall be measured from the front edge to the backrest.

The seating arrangements shall be provided in such a manner that there is minimal hindrance to passenger and goods movement over the platform. The required clearance as per schedule of dimensions must not be infringed.

This issues with the approval of PCE.
