Office of the PCMM
Ground Floor, Old GM Building,
Hajipur, Dist.- Vaishali
(Bihar) PIN No.-844101

No.ECR-HQ0(STR1)/1/2020

Dt.16.02.2021

All PHODs/DRMs/CWMs

Sub :- Procurement of all types of Lead Acid Batteries in HQ./HJP

Ref:- Modification in Stores Instruction No.92 Dtd.29.11.2018

At present, all types of Lead Acid Batteries against Stock & Non-stock demands are being procured by P-06 section of PCMM office/HJP for which felt complexity in furnishing the information and action for timely availabilities of materials.

For avoiding above problems as well as disbursing work load, it has now been deciding that all types of Lead Acid Batteries against Stock & Non-stock demands (under PL Group - 12, 17, 23, 29, and 45) will be dealt by P-14 section of PCMM office/HJP and (under PL Group - 50 & 67 and if any) will be dealt by P-06 section of PCMM office/HJP.

In this connection, it is relevant to mention here that quantity of Battery procurement should be examined as in many railways complete panels are being procured in which Battery is in built. Diesel Loco Battery demands need to review also before proceeding their procurement to avoid inventory of Batteries.

This has the approval of C/A (i.e. PCMM)
