Sub:- Power Audit of S&T installations in GC section.

Various works like ABS and Kavach are being executed in the GC section presently. IPS with adequate with redundant modules is a prerequisite for reliable power supply for the signalling gears.

It is therefore advised that divisions conduct a power audit at all the installations to ensure that adequate module with redundancy has been provided for the signalling installation in the GC section. All the SSE/Incharges may therefore be directed to conduct this audit station wise and submit reports clearly bringing out inadequacy, if any.

This exercise may be completed within a month of issue of this letter. The same will be reviewed by PCSTE soon.
